GRYPHON™ 4400-HC 2D SERIES **ODATALOGIC**

THE PURPOSE OF BAR CODE READERS IN THE HEALTHCARE INDUSTRY

The key mission of scanners in the healthcare industry is to improve the quality of patient care while reducing medication errors. Additionally, healthcare environments have requirements that scanners need to be regularly cleaned and disinfected. The Datalogic Gryphon™ HC product series is specifically developed for healthcare applications with Disinfectant-Ready enclosures treated with antimicrobial additives and are designed to withstand daily cleaning with harsh disinfectant solutions.

The Gryphon™ 4400-HC 2D readers can decode virtually any 1D and 2D bar code symbology and can read codes from LCD monitors, cell phones, smartphones and other mobile devices. Enhanced optics offer improved motion tolerance and high speed imaging to read fast moving codes as well as the ability to capture images such as signatures, complete IDs or prescriptions.

Ideally suited for stationary applications in administration, laboratory and hospital environments, the GD4400-HC 2D desktop model offers an affordable corded solution. while the GM4400-HC 2D or GBT4400-HC 2D cordless models (STAR or Bluetooth®) provide extended mobility for cordless operations.

The deep-red illumination of the Gryphon 4400 2D imagers eliminate the irritating 'flicker effect' found in competing products, allowing for comfortable allday usage. The highly visible 4-Dot aimer provides a clear indication of the reading area, making targeting codes quick and easy. Datalogic's patented 'Green Spot' technology provides additional visual good-read confirmation which is ideal for quiet environments like bedside patient care. Datalogic Aladdin™ configuration software and Remote Host Management software provide simple tools to manage deployed devices and keep them synchronized across an enterprise.
